

Using technology to combat illiteracy and foster workforce development

## **Bailey Institute launches TDEP in the U.S.**

### **Volunteers are invited ...**

- To mentor participants in the TDEP computer labs in Germantown Maryland starting March 2012
- Bailey Institute's proven **Technology-Driven Education Project (TDEP)** will benefit public housing residents of Montgomery County, Maryland, U.S.A.

**TDEP is designed to quickly and cost efficiently** raise educational standards to the GED level and provide orientation to careers in health, science and IT for challenged populations.

### **Volunteer Qualifications:**

#### **Experience in any combination of the following areas is a plus:**

1. Familiarity with Windows XP, Vista, or Win 7 and Internet explorer 8
2. Comfort and experience working with web-based education
3. Basic IT experience
4. Working knowledge of Math, English or Science at the 12<sup>th</sup> grade level and beyond
5. Coaching and mentoring skills
6. Knowledge of Careers in:
  - a. Health
  - b. Information Technology
  - c. Science
